The Exchange will be worked in the following way, viz a Hoad Office will be established in the central part of the town provided with the best Telephone appliances according to the newest and most approved European and American inventions. The dialogue between the subscribers is course quite private, and can only be heard by the two parties concerned. It should distinctly be understood that the messages are not spoken to the Central Office, and thence transmitted to the person to be communicated with, but the two wires are simply switched together, thus forming one continuous line, over which conversation can be carried with perfect case and privacy.

The Central Office will, if practicable, be open to the general public, so that any person can thence communicate with the Subscribers. For this service non-subscribers would have to pay a small fee according to the time they occupy the wire.

The Telephones used by the Company are the Combination-Bell-Edison, These Instruments, which are far superior to all other Telephones on account of their great distinctness of sound, combined with easy namagement, have net with unrivalled success throughout the world, and are now also adopted by the British Government Departments in England and India.

THE COUNTERFEIT CASH CASE. The case in which two Chinese householders were charged with being in possession of a quantity of base or counterfeit coin of the kingdom of Annam, again occupied the attention of the Court to-day, one of the defendants only being present as at the former hearings.

Mr Watton, of the firm of Brereton and Wotton, again appeared for the defence: Captain Deane said that before opening the case it would simplify matters if he called upon Inspector Perry to produce a certain number of the coins upon which proceedings would be taken, and he would withdraw the charge as against the -remainder of the coin.

Inspector Perry, recalled, said he produced nineteen coins similar to that he had previously put in, and upon the evidence already taken plead that they are counterfeit Annumese cash. IN ORIGINAL JURISDICTION. (Before the Hon. Francis Snowden, Acting Chief Justice.) Thursday, Nov. 24.

The Attorney General said the bringing of the matter into Court was a mere formality. The defendants had agreed to submit to all the terms proposed with one exception, and that was as to the reshipment of the goods to the manufacturer in Germany. He submitted that this was an arrangement which the Court could hardly sanction. They were counterfeit goods, and the Court would scarcely require their

delivery up merely for the purpose of their being sent back. The Acting Chief Justice asked whether in the usual course of practice these sort of

things were not destroyed. Mr Hayllar said the goods were consigned to defendants, who were in the position of agents receiving them for sale. They were not the only persons who had received them, but they had been the persons chosen to hear the brunt of that action when Mr Keating moved in the matter; and of course this entailed upon them a great deal of annoyance and worry, and he thought that under the circumstances reshipment to Germany would be equitable. The Acting Chief Justice said he thought the defendants had behaved extremely well. The parties agreed between themselves as to what was to be done with the goodstrade marks to be destroyed.

Endoavours are made to present a resume in bach number of the contents of the most recent works bearing on Chinese matters. Great attention is also paid to the Review

Notes and Replies are classified together as "Notes" (head references being given, when furnished, to previous Notes or Queries), as are also those queries which though asking for information, furnish new or uppublished details concerning the matter in hand. It is desirable to make the Queries proper as brief and as much to the point as possible.

Christian Advocate (U.S.) Trubuer's Oriental Record contains the following notice of the China Review; - " This is the title of a publication, the first number of which has lately reached us from Hongkong, where it had been not on foot as in some respects a continuation of Notes and Queries on thing and Japan, the extinction of which useful serial a year or two ago has been much regretted in Europe as well as in Chins. Theoresent publication, judging by the number now before us, is intended to occupy a pasition, as regards China and the neighbouring countries, somewhat similar to that which has been filled in India by the Calcutta Review. The great degree of attention that has been hestowed of late years; uron the investigation of Chinege literature, anliquities, and social developments, to say nothing of linguistic studies, has led to the accumulation of important states of informaation, rendering some such channel of publicity as is now provided extremely desirable ; and contributious of smcb interest may fairly be looked for from the members of the foreign consular services, the Unipose. Qustoms, corps, and the missionary body. among whom a high degree of Uhineso scholarship, is .now assiduously cultivated, and who are severally represented in the first number of the lieview by papers highly creditable to their respective authors. In a paper on Lr. Leggo's She King, by the Rey. E. J. Eitel, to which the place of honour is deservedly given; an excellent summary is presented of the chronological problems, and arguments involved in connexion with this important work, Some translations from Chinese novels and plays are marked by both accuracy and freshness of style; and an account of the carear of the Chinese poet-statesman of the sleventh century, Su Tung-plo, by Mr. E. C. Bowra, is not only historically valuable, but is also distinguished by its literary grace. Beside notices of new books relating to China and the East, which will be a useful feature of the Review, if carried out with punctuality and detail, we are glad to notice that "Notes" and "Queries" are destined to find a place in its pages also. chief support of the paper is of course derived from the native community, amongst whom also are to be found the guarantors and scourities necessary to place it on a business and legal footing. The projectors, basing their estimates upon the most reliable information from the various Ports in China and Japan,from Australia, California, Singapore, Penang, Saigon, and other places frequented by the Chinese, - consider themselves justified in guaranteeing an ultimate circulation of between 3,000 and 4,000 cories. The advantages offered to savertiers are therefore unusually great, and the foreign community generally will find It to their interest to avail themselves of

The field open to a paper of this description-conducted by native efforts, but Progressive and anti-obstructive in toneis almost limitless.
